- ▶ For MapGuide SP download information (page2)
- ▶ Open Spatial Australia Knowledgebase coming soon
- ▶ Contact us to arrange your upgrade to enlighten v2.6.1

“Enlighten has recently been chosen by Armidale Dumaresq Council to serve the New England Strategic Alliance Councils.”

Enlighten Version 2.6.1

We have been working hard during the past few months to include many new features suggested to us by you, our clients. Moreover release 2.6 Service Pack 1 includes a rollup of patches that have been issued to clients since the release of enlighten version 2.6.0.

We are very excited about some of the features that have been incorporated in this service pack.

Here's a short list of some of the new features:

- AquaRate Integration
- Map highlighting from Searches and Integration overriding MWF
- Leader arrows and user defined symbols within redline function
- Smaller redline text to support text in meters
- Area inquiry tool now displays the length of line data
- Improved printing... and much more to come in 2.7
- Exporting of redline data to XML

+ many more items. Please refer to the release.txt which can be found in your websites folder after installation is complete....

Autodesk MapGuide 6.5 SP1

This service pack addresses maintenance issues such as the support of current operating systems, databases, and file formats.

Some of the most requested items included in this service pack are support for DWG™ 2007, Internet Explorer® 7, Windows Server® 2003, and Oracle® 10g applications.

Review the Readme available [here](#) for more information.

For installation we recommend following Autodesk's own [installation guide](#) which is on Autodesk's website.

See page 2 of this newsletter for all of the products available to download from the Autodesk website.

[English - MgSDFComponentToolkit6.5SP1.exe](#)

Autodesk MapGuide Dynamic Authoring Toolkit

[English - MgDynamicAuthoringToolkit6.5SP1.exe](#)

Knowledge Base is Being Developed

You will be glad to know that a knowledge base of information will soon be released to all clients who are registered for support with Open Spatial.

Many of the articles and FAQ's that will be included in the knowledge base come from frequently asked questions by clients and hints about using the software that support have provided to you over the past year.

We hope that access to the knowledge base will help you answer questions and solve problems promptly.

Your comments and suggestions on the knowledge base content will be most appreciated

Improvements are also planned for our support website and over the coming year you will begin to see gradual improvements to the system.

"This Service Pack fixes the incompatibility between MG6.5 and Oracle 10.2.02 on the same server."

"The Knowledge base is being built gradually by our very own Kirsten Pines."
